DETAILED ACTION

1. The request filed on February 21, 2006 for a request for continued examination (RCE) under 37 CFR 1.114 based on patent application 09/724,734 is acceptable and an RCE has been established. Claim 20 is cancelled. And a new dependent claim 21 is added. Accordingly, **claims 1-19 and 21** is pending/examined.
2. **Independent claim 9** was amended previously and was allowed together with its dependent claims 10-13 in the pervious office action.
3. **Independent Claims 1 and 18** is amended.

Allowable Subject Matter

4. **Claims 1-19 and 21** are allowed.
5. The following is an examiner's statement of reasons for allowance:
 - **Referring to the independent claims 1** the art on the record, in particular **the combination of Trimberger and Erickson discloses each and every limitations of the claim before the claim is amended.** However, the art on the record does not disclose or suggest the amended limitation. As applicant persuasively argued, the amended limitation recites the patentably distinct features of the present invention. Features of unencrypted control words that indicate whether a plurality of data words specifying the design is a plurality of encrypted words for specifying an encrypted design.

None of the prior art of record taken singularly or in combination teaches such claim containing a particular/specific functional limitation recited above in combination with the limitation included in the respective claim.

Accordingly, the submitted amended independent claim 1 is patentably distinct over the art on the record, namely the combination of Trimberger and Erickson.

Art Unit: 2132

Therefore, for the reason provided above, the amended independent claim 1 is found to be novel and allowed.

- **Referring to the independent claims 9, the claim was previously allowed.**

The combination of Trimberger and Erickson discloses each and every limitations of the first claim before it was amended. However, applicant filed, amendment after non-final rejection on 08/10/2005 and amended claim 9. The art on the record does not disclose or suggest the amended limitation. As applicant persuasively argued, the amended limitation recites the following patentably distinct features of the present invention. **Features of a second plurality of words corresponding to the first plurality of words and a third plurality of words for controlling loading of configuration data into a second PLD; a forth plurality of words corresponding to the third plurality of words and the second and the fourth plurality of words specifying a design is encrypted and the corresponding at least one of the first and third plurality of words is unencrypted.**

None of the prior art of record taken singularly or in combination teaches such claim containing a particular/specific functional limitation recited above in combination with the limitation included in the respective claim.

Accordingly, the submitted amended independent claim 9 is patentably distinct over the art on the record, namely the combination of Trimberger and Erickson. Therefore, for the reasons provided above, the amended independent claim 9 was found to be novel and allowed.

- **Referring to the independent claims 18 the art on the record, in particular **the combination of Trimberger, Erickson and Yin discloses each****

Art Unit: 2132

and every limitations of the claim before the claim is amended. However, the art on the record does not disclose or suggest the amended limitation. As applicant persuasively argued, the amended limitation recites the patentably distinct features of the present invention. Feature of forming a cipher block chaining initial value by replacing portion of a starting number with an address for loading a design into a PLD.

None of the prior art of record taken singularly or in combination teaches such claim containing a particular/specific functional limitation recited above in combination with the limitation included in the respective claim.

Accordingly, the submitted amended independent claim 18 is patentably distinct over the art on the record, namely the combination of Trimberger Erickson and Yin. Therefore, for the reason provided above, the amended independent claim 18 is found to be novel and allowed.

6. The dependent claims **2-8, 10-17 and 19 and 21**, being further limiting to the independent claims 1, 9 and 18, definite and enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
